

ACNS Recommendations Physician Staffing

NOTE: The situation surrounding COVID-19 is evolving rapidly and there are unique aspects at the institutional and local levels. Guidance provided by your institution, state and federal authorities should always take precedence over the recommendations provided here.

Physician Staffing

1. Work remotely whenever possible. For EEG, if remote interpretation is possible, there is no reason for attending physicians, residents or fellows to come to the hospital/lab just for reviewing studies.
2. Given in-person clinic visits will likely be reduced, consider staffing outpatient clinic on alternate or rotating days to limit provider and staff exposure.
3. Follow institutional and ACGME recommendations regarding scheduling of residents and fellows (www.acgme.org/covid-19)
