The *Journal of Clinical Neurophysiology*, a leading journal in Clinical Neurophysiology and the official journal of the American Clinical Neurophysiology Society (ACNS), is seeking applications for the position of Editor-in-Chief. The start date for the position is February 1, 2014, but the incoming Editor will be expected to begin work January 1, 2014 to ensure a smooth transition from the current Editor.

The ideal candidate will possess the following attributes:

1) A background in academic medicine, including participation on journal editorial boards;
2) Extensive experience in basic, clinical, or translational research in Clinical Neurophysiology;
3) The ability to make a commitment, including adequate time and energy, to continue to increase the reputation and importance of the Journal in the Clinical Neurophysiology community and the medical community at-large;
4) Member-in-good standing of ACNS ([www.acns.org](http://www.acns.org)).

Candidates should provide a vision statement that would include goals and plans for the content of the Journal, an assessment of the Journal's current strengths and weaknesses, and a description of specific gaps that could be addressed. Interested individuals should forward their CVs, vision statements, and letters explaining their qualifications for this position to:

**Deadline:** The deadline for receipt of this information is October 1, 2013.
Editor-in-Chief Position Description

Aims:
The American Clinical Neurophysiology Society and its Journal are dedicated to fostering excellence in Clinical Neurophysiology and furthering the understanding of central and peripheral nervous system function in health and disease through education, research, and the provision of a forum for discussion and interaction.

Responsibilities:
• Serve as Editor-in-Chief for a term of five (5) years;
• Set up the structure of the Editorial Office and select members to serve as Deputy Editor, Associate Editors, and members of the Editorial Board as needed;
• Increase the number of high-quality articles published by soliciting submissions, increasing the Journal’s visibility, and improving the impact factor;
• Organize the regular publication of review articles and associated CME questions, supplements, and advertisements, as appropriate;
• Maintain a peer-review process that is both time-sensitive and equitable;
• Review final versions of peer-reviewed manuscripts prior to submission for publication;
• Route appropriate manuscripts to the publisher for production;
• Plan the content of individual journal issues;
• Hold an annual Editorial Board meeting in conjunction with the Publisher and the ACNS Journal Oversight Committee;
• Ensure that the editorial and budgetary goals for the Journal are met;
• Collaborate with the ACNS Journal Oversight Committee and Council;
• Work effectively with the LWW staff supporting the journal;
• Provide periodic written reports to the ACNS Council;
• Coordinate website updates with the ACNS Web Editor and Website & Social Media Committee;
• Keep the journal relevant to ACNS members.

Compensation:
Compensation is available to the Editor-in-Chief, along with editorial office support.

About the Journal:
The Journal of Clinical Neurophysiology features original research articles on the neurophysiology of both central and peripheral nervous systems of humans in health and disease. As such, most published manuscripts involve EEG, EP, MEG, TMS, EMG, or NC testing and analysis. In addition, approximately half of the issues contain invited reviews of topics of current interest in Clinical Neurophysiology. Recently, this has included special issues covering neurological intra-operative monitoring (NIOM) twice annually. The new editor will have a major role in determining new features of the Journal.
